-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The specification is objected to as being improper. The reference to claims 1 and 2 on page 6 of the specification and to claim 3 on page 7 is improper. The specification should support the claims and not vice versa. Correction is required. Also "four" in line 4 of paragraph 0003 should be "two".

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese reference 6-14193 in view of either Japanese reference 4-107111 or 2000-344134.

Japanese reference 6-14193 contains all claimed elements except the drive train.

Japanese reference 4-10711 discloses a rear engine 16, transmission 20, front axle housing 21, transfer 24 and drive shaft 25.

Japanese reference 2000-344134 discloses an engine 31, transmission 33, transfer case 34 and an unlabeled drive shaft extending between the front wheels and 34.

It would have been obvious to use any conventional drive train including a drive train as taught by Japanese reference 6-14193 or 2000-344134 in Japanese reference 6-14193 since 6-14193 does not disclose the details of his drive train.

Regarding claim 2, it is conventional to use a differential gear arrangement in a differential housing. This arrangement utilizes a beveled gear rotatable about the drive shaft axis and beveled gears rotatable about the axis of each axle. It would have been obvious to use such a differential gear arrangement in Japanese reference 6-14193 as modified by either Japanese reference 4-107111 or 2000-344134 since as noted above such an arrangement is conventional and the references do not disclose the gearing arrangement in their differentials. Note either axle gear would meet the claimed bevel gear in claim 2.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donald Underwood whose telephone number is 571-272-6933. The examiner can normally be reached on Mon-Thursday 7:30-4:30.
